About

Fresh Master of Computing graduate from ANU with real world experience shipping software across fullstack, backend, and data systems. I build things that work and pick up new tools quickly, whether that's a new framework, a cloud platform, or a production bug at 2am. Looking for a team where I can contribute from day one and keep getting better.

Education

Australian National University, Canberra, ACT

Jul 2024 – Jun 2026

Master of Computing (Specialization: Artificial Intelligence)

GPA: 5.5/7

Relevant Coursework: Artificial Intelligence, Advanced Topics in AI, Software Construction, Relational Databases, Human-Computer Interaction, Document Analysis

M.S. Ramaiah Institute of Technology, Bengaluru, KA

Nov 2020 – May 2024

Bachelor of Engineering in Computer Science

GPA: 8.36/10

Relevant Coursework: Data Structures & Algorithms, Data Mining & Machine Learning, Cloud Computing & Big Data, Introduction to Deep Learning, Operating Systems

Skills

Languages: Java, Python, Kotlin, TypeScript, JavaScript, SQL / PostgreSQL, HTML / CSS

Frameworks & Libraries: Next.js, NestJS, React, Node.js, Flask, PyTorch, TensorFlow, JavaFX

Cloud & Hosting: AWS, Vercel, Heroku, Firebase, Google Cloud Platform (GCP), Supabase

DevOps & Tools: Git, Docker, CI/CD, Android Studio, Postman

AI & ML: Gemini API, Hugging Face, YOLO, CNNs, NLP, OCR

Experience

Bardar (Visit: [bardar.online](#))

Canberra, ACT

Software Developer — ANU TechLauncher Industry Capstone

Jul 2025 – Jun 2026

- Engineered the entire NestJS backend from scratch, owning 10+ REST APIs across artist discovery, geo-sync, genre filtering, and head-to-head comparison, integrated with source APIs and deployed on Heroku.
- Designed a log-scaled artist scoring algorithm to rank thousands of artists across any city globally.
- Architected a priority task queue and per-API rate limiter to orchestrate concurrent external API calls, reducing search latency by 20–30% and eliminating pipeline breakage under concurrent load.
- Led end-to-end integration of an agentic AI chatbot (Gemini 2.5 Flash) with access to all backend tool calls, enabling natural language artist discovery and dynamically rendering rich UI cards from API responses.

Axiscades Technologies Ltd

Bengaluru, KA

Data Science and Backend Intern

Feb 2024 – Jul 2024

- Delivered Python/Flask backend APIs and a QR-based inventory system to automate industry inventory workflows, reducing processing time by 25%.
- Implemented YOLO-based defect detection pipelines for production line quality control, identifying assembly errors and container defects, cutting error rates by 60%.

Cuvasol Technologies Pvt Ltd

Bengaluru, KA

Software Consultant Intern

Oct 2022 – Jan 2023

- Developed Android onboarding flows in Java to streamline user registration, boosting engagement by 40%.
 - Automated 90% of QA testing workflows, reducing daily bug reports to under 2 per week.
-

Projects

Nutricate | Android, Java, Firebase, OCR, SQLite

Best Social Hackathon League Award, IISc Bengaluru

- Built an Android app that uses OCR to scan food product labels and cross checks ingredients against a local allergen database, enabling users to instantly identify unsafe products.

PoliRec | Java, Hugging Face LLM

- Developed a unified government vehicle management app with separate user and admin portals, integrating a Hugging Face LLM chatbot to automate query resolution and reduce manual effort.
-

Publications

- Android Application for Food Label Recognition to Ensure Safe Food Consumption Leveraging OCR*, IEEE ICCCNT 2023. **10 citations.**
- Customer Feedback Analysis Based on Emotion Detection Using Machine Learning Techniques with Privacy Preservation*, IEEE ICCPCT 2023. **7 citations.**
