Summary

Software Engineer and recent Master of Computing (AI) graduate from ANU with industry experience shipping backend, full-stack, and Machine Learning systems: TypeScript/NestJS and Python APIs, LLM-powered agents, and Computer Vision pipelines. I take ownership of what I build and care as much about why something is worth building as how.

Education

Australian National University, Canberra, ACT — *Jul 2024 – Jun 2026*
Master of Computing (Specialisation: Artificial Intelligence) — GPA: 5.6/7
Relevant Coursework: Artificial Intelligence, Advanced Topics in AI & Robotics, Software Construction, Relational Databases

M.S. Ramaiah Institute of Technology, Bengaluru, India — *Nov 2020 – May 2024*
Bachelor of Engineering in Computer Science — GPA: 8.36/10
Relevant Coursework: Data Structures & Algorithms, Operating Systems, Machine Learning, Cloud Computing

Skills

Languages: Python, TypeScript, JavaScript, Java, SQL, Kotlin, C++, HTML, CSS
Frameworks: NestJS, Node.js, Flask, asyncio, aiohttp, React, Next.js, Android, REST APIs, WebSockets
AI & LLMs: Large Language Models (LLMs), AI Agents, Tool Calling, MCP, RAG, Vector Databases, Prompt Engineering
Machine Learning: PyTorch, TensorFlow, Hugging Face, LangChain, Deep Learning, Computer Vision, YOLO, NLP, OCR
Cloud & Databases: PostgreSQL, Supabase, SQLite, Firebase, AWS, Azure, Google Cloud Platform (GCP), Heroku, Vercel
DevOps & Practices: Git, GitHub Actions, CI/CD, Docker, Linux, pytest, JUnit, Unit Testing, Agile/Scrum, Claude Code

Experience

Bardar – Music Artist Discovery Platform, Canberra, ACT — *Jul 2025 – Jun 2026*
Software Developer (ANU TechLauncher) — bardar.online

- Engineered the entire TypeScript/NestJS backend from scratch, owning 10+ REST APIs across artist discovery, geo-sync and head-to-head comparison, backed by PostgreSQL (Supabase) and deployed on Heroku via CI/CD pipelines.
- Designed a log-scaled artist scoring algorithm to rank thousands of artists across any city globally.
- Architected a priority task queue and per-API rate limiter with fallback handling to orchestrate concurrent external API calls, reducing search latency by 20–30% and eliminating pipeline breakage under concurrent load.
- Led end-to-end integration of an agentic AI chatbot (Gemini 2.5 Flash LLM) with access to all backend tool calls, enabling natural language artist discovery and dynamically rendering rich UI cards in the React/Next.js frontend.

Axiscades Technologies Ltd, Bengaluru, India — *Feb 2024 – Jul 2024*
Data Science and Backend Intern

- Delivered Python/Flask backend APIs and a QR-based inventory system to automate industrial inventory workflows, reducing processing time by 25%.
- Built YOLO-based Computer Vision defect detection pipelines for production line quality control, identifying assembly errors and container defects and cutting error rates by 60%.

Indian Space Research Organisation (ISRO), Bengaluru, India — *Feb 2023 – Feb 2024*
Undergraduate Research Intern (Data Science)

- Designed and deployed Machine Learning and Deep Learning models (CNNs, Autoencoders, Random Forest) across 50+ configurations to optimise satellite mission operations, achieving a 30% increase in operational efficiency.
- Developed predictive maintenance workflows using Expert Systems and Machine Learning to detect satellite part failures with 85% accuracy, reducing maintenance downtime by 25%.

Projects

Keyboard DS5 | *Python, asyncio, aiohttp, WebSockets, pytest, GitHub Actions* | GitHub — *Open source*

- Built a Windows app that controls a PS5 by keyboard and mouse over Sony's Remote Play protocol, at up to 125 Hz.
- Extended an archived open-source protocol library, fixing 7 defects and cutting connect time from 5.5 s to about 1 s.
- Wrote 540+ automated tests and a GitHub Actions pipeline that tests, packages, hashes and attests every Windows release.

Nutricate | *Android, Java, Firebase, OCR, SQLite* | GitHub

- Led a 4-person team building an offline-first Android app that flags allergens via OCR; won the Best Social Hackathon League Award (IISc).

Publications & Leadership

- **Publications:** 3 peer-reviewed papers across IEEE and IJACSA with 21 total citations (Google Scholar).
- **Team Lead (Front of House)**, Capitol Bar and Grill, QT Canberra: led a team while studying full-time.
